

### **New from the Global Education Centre, a CD Rom on Global Disparities**

Designed to assist teachers in the teaching of Geography 2.3 *Disparities in Development*, this new resource is packed full of information on what Global Disparities exist today. There are over nine colourful PowerPoints, chapters on Romania, the USA, Brazil, Australia and China, trial assessment activities in the global issues of Oil and Squatter Settlements, new ideas for other global geographic topics and the latest development indicators. There are graphs, tables and colourful images in every chapter, with student activities that link in with the curriculum at every stage.

This CD Rom will become an invaluable tool for teachers who are passionate about global topics and the inequality of the world we live in.

The CD Rom comes with a fully colour laminated A2 size poster of development indicators for 50 countries.

Only \$40 for this resource, order your copy today from
